

$$\chi = \frac{d\varphi}{d\chi}$$

$$x \rightarrow \varphi = x \Delta$$

↑ amplitudo
derivative

ANALISI NON LINEARE

massimo $q_g = \times \times$

CHIARIMENTI SU A.N.L.

1) confronto

spost. con. ad q_g - capacità di spost.

2) come si calcolano le capacità di spost.

rotazioni
plastiche?

VALIDAZ. CON A.L.

3) spostamenti per q_g con A.L.

4) distinz. cercare A.N.L. cfr. con dista. cercano A.L.
per q_g ($P > \dots$)

interval. von punkt.
